

UNISTAR CHEMICALS

INDUSTRIAL CHEMICAL PRODUCT CATALOGUE

RELIABLE INDUSTRIAL CHEMICAL SOLUTIONS

ABOUT UNISTAR CHEMICALS

Company Overview:

Unistar Chemicals is a trusted supplier and distributor of industrial chemicals, serving diverse industries with a commitment to quality, reliability, and customer satisfaction. We specialize in sourcing and supplying premium-grade chemical products that meet industry standards and support various manufacturing and industrial applications. With a strong distribution network and a customer-focused approach, we ensure timely delivery, consistent product quality, and dependable service. Our goal is to build long-term partnerships by providing cost-effective chemical solutions tailored to the evolving needs of businesses across India.

Vision:

To become one of India's most trusted industrial chemical suppliers through quality products, ethical business practices and long-term customer relationships.

Mission:

To deliver premium industrial chemicals with reliable sourcing, competitive pricing, timely logistics and dedicated customer support.

Core Values:

1. Quality
2. Integrity
3. Reliability
4. Customer Commitment

➤ WHY CHOOSE UNISTAR CHEMICALS

Premium Quality Products

High-grade chemicals that consistently meet stringent industry specifications.

Reliable Supply Chain

A robust distribution network ensuring steady, uninterrupted availability.

Competitive Pricing

Cost-effective solutions that deliver strong value without compromising quality.

Wide Product Portfolio

A broad range of industrial chemicals to serve diverse applications.

Customer-Focused Service

Responsive support and tailored solutions built around your requirements.

Timely Delivery

Dependable logistics that get products to you on schedule, every time.

Industries We Serve

Our chemical products support a broad spectrum of industries, each with its own quality standards and requirements:

- Water Treatment
- Pharmaceuticals
- Food Processing
- Agriculture
- Textile
- Paints & Coatings
- Detergents & Cleaning
- Chemical Manufacturing

At Unistar Chemicals, we are committed to delivering consistent quality, dependable supply and responsive service on every order. By combining reliable products with a genuine customer focus, we aim to earn lasting trust and build long-term business partnerships that support the growth and success of the industries we serve.

OUR PRODUCT CATEGORIES

Unistar Chemicals supplies a comprehensive range of industrial and specialty chemicals to support diverse industries. From bulk commodity chemicals to precise specialty formulations, our portfolio is sourced to meet exacting quality standards and consistent performance, backed by dependable supply and technical support that keeps our customers' operations running efficiently and safely.

Industrial Chemicals

Core chemicals supporting manufacturing and processing operations.

Water Treatment Chemicals

Solutions for purification, treatment and effluent control.

Solvents

Industrial-grade solvents for cleaning, blending and extraction.

Acids

Mineral and organic acids for a wide range of process applications.

Alkalis

Bases and caustic products for neutralisation and processing.

Salts & Minerals

Essential salts and minerals for diverse industrial uses.

Food Grade Chemicals

Food-safe ingredients and additives meeting industry standards.

Specialty Chemicals

Tailored specialty compounds for specific applications.

The complete product range is available on request, and customised bulk supply solutions are offered to meet specific industrial requirements.

➤ *PRODUCT SHOWCASE*

Caustic Soda Flakes

NaOH

Caustic Soda Flakes are a high-purity sodium hydroxide product supplied in a convenient, easy-to-dissolve flake form. Valued for strong alkalinity and consistent quality, they serve as an essential raw material across a wide range of industrial and manufacturing processes.

Applications

- Soap & detergent manufacturing
- Pulp, paper & textile processing
- Water & effluent treatment
- Chemical & petrochemical processing
- Metal cleaning & surface treatment

Key Benefits

- High purity, consistent flake quality
- Easy handling, storage & dissolution
- Strong, reliable alkaline performance
- Suitable for diverse industrial uses

Available Packaging: 25 kg & 50 kg HDPE bags; 1 MT jumbo bags

Hydrochloric Acid

HCl

Hydrochloric Acid is a versatile mineral acid supplied as a clear, high-strength aqueous solution. Valued for its strong acidity and dependable, consistent performance, it is widely used for pickling, neutralisation, cleaning and processing applications across a broad range of industries.

Applications

- Steel pickling & metal cleaning
- pH adjustment & neutralisation
- Water treatment & regeneration
- Chemical synthesis & processing
- Textile, leather & food processing

Key Benefits

- Consistent concentration & quality
- Fast, effective acid performance
- Reliable bulk supply availability
- Versatile across many industries

Available Packaging: 30 kg carboys; 250 kg HDPE drums; bulk tankers

➤ *PRODUCT SHOWCASE*

Sulphuric Acid

Sulphuric Acid is a fundamental, high-strength mineral acid supplied as a clear, dense liquid. Prized for its powerful reactivity and consistent concentration, it serves as an essential raw material and processing agent across a wide range of industrial and manufacturing operations.

Applications

- Fertiliser & phosphate production
- Metal pickling & processing
- Chemical & petrochemical manufacturing
- Water & effluent treatment
- Batteries & electrolyte solutions

Key Benefits

- High concentration, consistent strength
- Powerful, reliable reactivity
- Dependable, large-scale bulk supply
- Versatile industrial workhorse

Available Packaging: 35 kg carboys; 250 kg HDPE drums; bulk tankers

Phosphoric Acid

Phosphoric Acid is a versatile mineral acid supplied as a clear, high-purity solution for both industrial and food-grade uses. Valued for its consistent quality and effective performance, it supports fertiliser production, surface treatment, food processing and many other specialised applications across diverse industries.

Applications

- Fertiliser & phosphate production
- Metal surface treatment
- Food & beverage processing
- Detergents & cleaning agents
- Water treatment & conditioning

Key Benefits

- Consistent purity and quality
- Food-grade and industrial grades
- Effective, reliable performance
- Dependable bulk supply

Available Packaging: 30 kg carboys; 250 kg HDPE drums; bulk tankers

➤ *PRODUCT SHOWCASE*

Hydrogen Peroxide

Hydrogen Peroxide is a powerful, eco-friendly oxidising agent supplied as a clear, colourless aqueous solution. Valued for its strong oxidation, effective disinfection and clean breakdown into water and oxygen, it serves bleaching, treatment and sanitising needs across a wide range of industries.

Applications

- Textile & paper bleaching
- Water & wastewater treatment
- Disinfection & sanitisation
- Chemical synthesis & oxidation
- Electronics & metal surface cleaning

Key Benefits

- Strong, effective oxidising power
- Breaks down cleanly into water & oxygen
- Chlorine-free, residue-free action
- Consistent strength and quality

Available Packaging: 35 kg carboys; 250 kg HDPE drums; bulk tankers

Sodium Hypochlorite

Sodium Hypochlorite is a versatile chlorine-based solution supplied as a clear, pale-yellow liquid. Valued for its powerful disinfecting and bleaching action and dependable, consistent performance, it is widely used for water treatment, sanitisation and cleaning across municipal, industrial and commercial applications.

Applications

- Water & wastewater disinfection
- Surface & equipment sanitisation
- Textile & pulp bleaching
- Odour & effluent control
- Industrial & institutional cleaning

Key Benefits

- Powerful disinfecting & bleaching action
- Fast-acting, broad-spectrum performance
- Consistent available-chlorine strength
- Reliable bulk supply availability

Available Packaging: 35 kg carboys; 250 kg HDPE drums; bulk tankers

➤ *PRODUCT SHOWCASE*

Isopropyl Alcohol (IPA)

Isopropyl Alcohol is a versatile, fast-evaporating solvent supplied as a clear, colourless liquid of high purity. Valued for its excellent cleaning, disinfecting and dissolving properties, it is widely used across pharmaceutical, electronics, cosmetic and industrial applications where a clean, residue-free finish is essential.

Applications

- Pharmaceutical & laboratory use
- Electronics & precision cleaning
- Disinfectant & sanitiser production
- Cosmetics & personal care
- Industrial degreasing & solvents

Key Benefits

- Fast evaporation, residue-free finish
- High solvency and purity
- Effective cleaning and disinfection
- Versatile across many industries

Available Packaging: 30 kg carboys; 160 kg HDPE drums; bulk tankers

Extra Neutral Alcohol (ENA)

ENA

Extra Neutral Alcohol is a highly refined, food-grade ethyl alcohol supplied as a clear, colourless liquid with an exceptionally neutral aroma. Valued for its high purity and consistent quality, it serves as a premium base for beverages, flavours, pharmaceuticals and personal-care formulations.

Applications

- Alcoholic beverage production
- Flavours & fragrance manufacturing
- Pharmaceutical formulations
- Cosmetics & personal care
- Vinegar & food processing

Key Benefits

- High purity, neutral aroma
- Consistent food-grade quality
- Versatile production base
- Reliable bulk supply

Available Packaging: 30 kg carboys; 210 kg HDPE drums; bulk tankers

➤ *PRODUCT SHOWCASE*

Liquid Paraffin

Mineral Oil

Liquid Paraffin is a highly refined mineral oil supplied as a clear, colourless and odourless liquid of consistent purity. Chemically stable and non-reactive, it offers excellent lubricating and moisturising properties, making it a dependable ingredient across pharmaceutical, cosmetic, food-processing and industrial applications.

Applications

- Pharmaceutical & laxative formulations
- Cosmetics & skincare products
- Lubricants & release agents
- Textile & polymer processing
- Food-grade machinery lubrication

Key Benefits

- Odourless, colourless and stable
- Excellent lubrication and moisturising
- Chemically inert and non-reactive
- Consistent high-purity quality

Available Packaging: 50 kg carboys; 210 kg HDPE drums; bulk tankers

White Oil

Mineral Oil

White Oil is a highly purified pharmaceutical and industrial grade mineral oil, supplied as a clear, colourless, odourless and tasteless liquid. Highly stable and non-reactive, it is valued for its purity and versatility across pharmaceutical, cosmetic, food-contact and specialised industrial applications.

Applications

- Pharmaceutical & medicinal formulations
- Cosmetics & personal care
- Food-grade & packaging lubrication
- Textile, rubber & polymer processing
- Industrial & specialty lubricants

Key Benefits

- High purity and clarity
- Odourless, tasteless and stable
- Chemically inert and non-reactive
- Versatile across many industries

Available Packaging: 50 kg carboys; 210 kg HDPE drums; bulk tankers

➤ *PRODUCT SHOWCASE*

Potassium Nitrate (KNO_3)

KNO_3

Potassium Nitrate is a high-purity, water-soluble crystalline salt supplied as a white, free-flowing powder. Rich in both potassium and nitrogen, it delivers reliable performance as a plant nutrient and oxidising agent across agriculture, horticulture, food-processing and diverse industrial and specialty manufacturing applications.

Applications

- Fertilisers & specialty nutrients
- Greenhouse & horticulture feeding
- Food preservation & processing
- Glass & ceramics manufacturing
- Fireworks & industrial oxidisers

Key Benefits

- High purity and solubility
- Dual potassium and nitrogen source
- Fast, efficient nutrient uptake
- Consistent, free-flowing quality

Available Packaging: 25 kg bags; 50 kg bags; bulk supply

Potassium Chloride (KCl)

KCl

Potassium Chloride is a high-purity, water-soluble crystalline salt supplied as white to off-white crystals or powder. A concentrated source of potassium, it is widely used as a fertiliser and versatile industrial raw material across agriculture, food-processing, pharmaceutical and chemical manufacturing applications.

Applications

- Potash fertilisers & agriculture
- Food processing & seasoning
- Pharmaceutical & nutritional use
- Water treatment & softening
- Industrial & chemical processing

Key Benefits

- High purity and solubility
- Concentrated potassium content
- Versatile across many industries
- Consistent, reliable quality

Available Packaging: 25 kg bags; 50 kg bags; bulk supply

PRODUCT SHOWCASE

Magnesium Sulphate (MgSO_4)

Magnesium Sulphate is a high-purity, water-soluble crystalline salt supplied as colourless crystals or a white, free-flowing powder. A readily available source of magnesium and sulphur, it delivers reliable performance across agriculture, healthcare, food-processing and a wide range of industrial and manufacturing applications.

Applications

- Fertilisers & crop nutrition
- Epsom salt & healthcare products
- Food & pharmaceutical processing
- Bath & personal care products
- Industrial & chemical manufacturing

Key Benefits

- High purity and solubility
- Rich magnesium and sulphur source
- Fast, efficient nutrient uptake
- Consistent, free-flowing quality

Available Packaging: 25 kg bags; 50 kg bags; bulk supply

Magnesium Chloride (MgCl_2)

Magnesium Chloride is a high-purity, water-soluble crystalline salt supplied as white to off-white flakes or powder. A versatile source of magnesium, it is widely used for de-icing, dust control, agriculture, food-processing and a broad range of industrial and chemical applications.

Applications

- De-icing & road treatment
- Dust control & soil stabilisation
- Fertilisers & crop nutrition
- Food processing & supplements
- Industrial & chemical processing

Key Benefits

- High purity and solubility
- Effective moisture absorption
- Versatile across many industries
- Consistent, reliable quality

Available Packaging: 25 kg bags; 50 kg bags; bulk supply

PRODUCT SHOWCASE

Citric Acid ($C_6H_8O_7$)

Citric Acid is a high-purity, white crystalline organic acid produced by the natural fermentation of sugars. Fully water-soluble and biodegradable, it acts as a versatile acidulant, preservative and chelating agent across the food, beverage, pharmaceutical, cosmetic and industrial cleaning sectors worldwide.

Applications

- Food & beverage acidulant
- Pharmaceuticals & effervescent
- Cosmetics & personal care
- Household & industrial cleaning
- Water treatment & metal cleaning

Key Benefits

- High purity and solubility
- Natural, biodegradable origin
- Effective flavour and pH control
- Versatile chelating performance

Available Packaging: 25 kg bags; 1000 kg jumbo bags; bulk supply

Xanthan Gum

Food Grade

Xanthan Gum is a high-purity, food-grade polysaccharide produced by the natural fermentation of glucose. Supplied as a fine cream-coloured powder, it acts as a highly effective thickener, stabiliser and emulsifier, delivering consistent viscosity and texture across food, beverage, pharmaceutical, cosmetic and industrial formulations.

Applications

- Food & beverage thickening
- Sauces, dressings & dairy
- Pharmaceutical suspensions
- Cosmetics & personal care
- Oil drilling & industrial fluids

Key Benefits

- Excellent thickening and stability
- Stable across temperature and pH
- Natural, fermentation-derived origin
- Consistent viscosity and texture

Available Packaging: 25 kg bags; 25 kg drums; bulk supply

➤ *PRODUCT SHOWCASE*

Urea ($\text{CO}(\text{NH}_2)_2$)

500KG/Bag

1000KG/Bag

Urea is a high-purity, white crystalline compound and the most widely used nitrogenous fertiliser, containing 46% nitrogen. Highly soluble and readily biodegradable, it delivers efficient nitrogen nutrition to crops while also serving diverse industrial, resin, feed and emission-control applications across global agriculture and manufacturing.

Applications

- Nitrogen fertilisers & crop nutrition
- Urea-formaldehyde resins & adhesives
- Animal feed supplements
- NO_x reduction (AdBlue/DEF)
- Industrial & chemical manufacturing

Key Benefits

- High nitrogen content (46%)
- High purity and solubility
- Efficient nutrient delivery
- Versatile industrial use

Available Packaging: 25 kg bags; 50 kg bags; bulk supply

Melamine ($\text{C}_3\text{H}_6\text{N}_6$)

Melamine is a high-purity, white crystalline organic compound rich in nitrogen, produced primarily from urea. Valued for its hardness, heat resistance and fire-retardant properties, it is used to manufacture durable resins, laminates, adhesives, coatings and moulding compounds across the furniture, construction and industrial sectors.

Applications

- Melamine-formaldehyde resins
- Laminates & surface coatings
- Adhesives & wood panels
- Moulding compounds & tableware
- Flame retardants

Key Benefits

- High nitrogen content
- Excellent hardness and durability
- Heat and fire resistance
- Consistent, high-purity quality

Available Packaging: 25 kg bags; 1000 kg jumbo bags; bulk supply

PRODUCT SHOWCASE

Benzalkonium Chloride (BKC)

Disinfectant

Benzalkonium Chloride (BKC) is a high-purity, cationic surfactant supplied as a clear liquid concentrate. A broad-spectrum quaternary ammonium disinfectant and biocide, it delivers effective control of bacteria, fungi and algae across hospital, industrial, agricultural and household sanitation applications while remaining stable, water-soluble and easy to formulate.

Applications

- Hospital & surface disinfection
- Water & swimming pool treatment
- Sanitisers & cleaning formulations
- Agriculture & animal husbandry
- Algacide & industrial biocide

Key Benefits

- Broad-spectrum antimicrobial action
- Stable and water-soluble
- Low odour and non-staining
- Easy to formulate and dilute

Available Packaging: 50 kg carboys; 250 kg drums; bulk supply

Poly Aluminium Chloride (PAC)

Water Treatment

Poly Aluminium Chloride (PAC) is a high-performance inorganic coagulant supplied as a pale-yellow liquid or spray-dried powder. Widely used in water and wastewater treatment, it rapidly removes turbidity, suspended solids and organic matter, delivering clearer water, faster settling and lower sludge volumes across municipal and industrial applications.

Applications

- Drinking water treatment
- Municipal wastewater treatment
- Industrial effluent clarification
- Paper & pulp sizing
- Sludge dewatering & thickening

Key Benefits

- Fast, effective coagulation
- Wide pH operating range
- Lower sludge generation
- Reduced chemical dosage

Available Packaging: 25 kg bags; 250 kg drums; bulk supply

➤ *PRODUCT SHOWCASE*

Bleaching Powder

Calcium Hypochlorite

Bleaching Powder, chemically calcium hypochlorite, is a white to off-white powder with a characteristic chlorine odour and high available-chlorine content. A powerful oxidising, disinfecting and bleaching agent, it is widely used for water disinfection, sanitation, textile and paper bleaching across municipal, industrial and household applications.

Applications

- Drinking water disinfection
- Swimming pool sanitation
- Textile & paper bleaching
- Surface & area sanitation
- Sewage & effluent treatment

Key Benefits

- High available chlorine content
- Powerful disinfecting and bleaching
- Cost-effective and easy to store
- Reliable, consistent quality

Available Packaging: 25 kg drums; 50 kg drums; bulk supply

Ferric Alum

Water Treatment Coagulant

Ferric Alum is a high-efficiency iron-based coagulant supplied as pale-green to yellowish crystals or powder. Widely used in water and wastewater treatment, it rapidly neutralises charge and removes turbidity, colour, phosphates and suspended solids, delivering clearer water and dependable performance across municipal and industrial treatment applications.

Applications

- Drinking water clarification
- Municipal wastewater treatment
- Industrial effluent treatment
- Turbidity & colour removal
- Phosphate & odour control

Key Benefits

- Fast, effective coagulation
- Removes colour and turbidity
- Wide pH operating range
- Cost-effective performance

Available Packaging: 25 kg bags; 50 kg bags; bulk supply

➤ *PRODUCT SHOWCASE*

Refined Glycerine

Refined Glycerine is a clear, colourless, odourless and highly viscous liquid of exceptional purity. Derived from vegetable oils, this hygroscopic polyol serves as a versatile humectant, solvent and sweetener across pharmaceutical, cosmetic, food and industrial formulations, offering excellent moisture retention, stability and skin-friendly performance.

Applications

- Pharmaceutical syrups & formulations
- Cosmetics & personal care products
- Food & beverage humectant
- Toothpaste & oral care
- Industrial solvents & lubricants

Key Benefits

- High purity and clarity
- Excellent moisture retention
- Non-toxic and skin-friendly
- Stable and highly versatile

Available Packaging: 250 kg drums; 1250 kg IBC totes; bulk supply

Sodium Chloride

Sodium Chloride is a high-purity white crystalline salt, one of the most widely used industrial and food-grade chemicals. Readily soluble and chemically stable, it functions as an essential raw material, preservative and processing aid across chemical manufacturing, water treatment, food processing and de-icing applications worldwide.

Applications

- Chemical & chlor-alkali manufacturing
- De-icing & road maintenance
- Water softening & treatment
- Food processing & preservation
- Textile & dyeing processes

Key Benefits

- High purity and consistency
- Readily soluble and stable
- Versatile industrial raw material
- Cost-effective and widely available

Available Packaging: 25 kg bags; 50 kg bags; bulk supply

PRODUCT SHOWCASE

Dolomite

Dolomite is a naturally occurring calcium magnesium carbonate mineral, supplied as graded granules, chips or fine powder. Valued for its balanced calcium and magnesium content, hardness and chemical stability, it is widely used across steel, glass, construction, agriculture and refractory applications as a versatile, cost-effective industrial raw material.

Applications

- Steel & iron flux
- Glass & ceramics manufacturing
- Construction & aggregates
- Soil conditioning & agriculture
- Refractory & foundry applications

Key Benefits

- Balanced calcium and magnesium
- High hardness and stability
- Cost-effective raw material
- Consistent quality and purity

Available Packaging: 50 kg bags; 1000 kg jumbo bags; bulk supply

Black Sulphur

Industrial Sulphur

Black Sulphur is an industrial-grade sulphur product supplied as dark granules or powder, valued for its high sulphur content and reactivity. Widely used in fertilisers, sulphuric acid production, rubber vulcanisation, dyes and agrochemicals, it serves as an essential, cost-effective raw material across chemical, agricultural and industrial manufacturing sectors.

Applications

- Sulphuric acid production
- Industrial & chemical processing
- Fertilisers & agriculture
- Rubber vulcanisation
- Dyes & agrochemicals

Key Benefits

- High sulphur content
- Reactive and versatile
- Essential industrial raw material
- Cost-effective and reliable

Available Packaging: 25 kg bags; 50 kg bags; bulk supply

➤ *QUALITY ASSURANCE, PACKAGING & LOGISTICS*

Quality Assurance

At Unistar Chemicals, every product is sourced from trusted and established manufacturers and undergoes careful quality checks before dispatch. Materials are verified for consistency, purity and compliance with recognised industry standards, ensuring that each consignment meets the specifications our customers expect. This disciplined approach to quality helps us build lasting trust, minimise variability and deliver dependable performance across every order we supply.

Packaging

Our products are supplied in secure, durable packaging designed for safe industrial handling, storage and transportation. Depending on the material and order requirements, we offer bags, drums, barrels, cans and customised bulk packaging options. Each pack is sealed to protect against moisture, contamination and damage in transit, so goods reach their destination in the same reliable condition in which they left our facility.

Logistics & Supply

Backed by an organised distribution network, we focus on timely delivery and dependable supply across India. Orders are carefully planned, coordinated with trusted transport partners and monitored to ensure safe handling from dispatch to final destination. By combining efficient logistics with clear communication, we help customers maintain uninterrupted operations, meet production schedules and receive their materials on time, wherever their facilities are located.
